

# FAMILY PLANNING ONLY SERVICES

## WHAT IS IT?

An insurance program that provides low to no cost sexual and reproductive health care for people with limited income, including people under the age of 18.

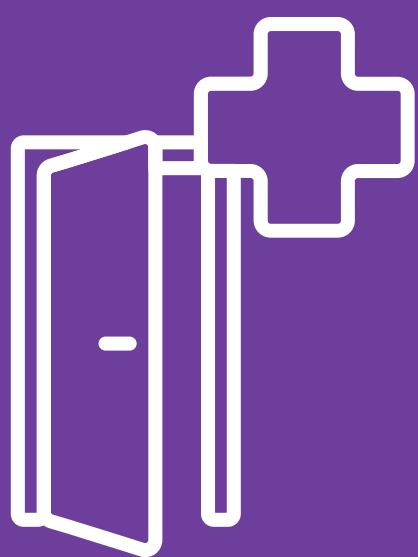

## WHAT IS COVERED?

Contraceptive services and supplies like birth control and condoms, STI testing and treatment, preventive services like pap smears, and some vaccines like the HPV vaccine.

## HOW DO I KNOW IF MY PATIENT IS ELIGIBLE?

Patients are eligible if they are of reproductive age, a Wisconsin resident, a US citizen or lawful resident, are not enrolled in Wisconsin Medicaid or BadgerCare Plus, and if they personally (not their parents) make less than \$3,840.30 a month.

## WHY SHOULD I CARE?

Teens who are scared of their parents finding out about their reproductive health care will not seek services as readily as those who are not scared. This leads to a gap in care.
